

Covid-19 Policy

Date of this version: October 2021

Responsibility: Manager

Author: Hannah Forster

Review Date: Ongoing

Version: 6

Camp Canary Limited recognises that careful planning is essential in order to keep the children and our staff safe, and to limit the spread of coronavirus/Covid-19, within our setting. Accordingly, we have conducted a thorough Covid-19 **risk assessment** and will review it on a half termly basis and whenever Government guidance changes.

Covid-19 symptoms

Covid-19 is a viral, respiratory disease, which is spread from person to person by close contact. It typically causes fever and a dry cough, and in some cases may progress to viral pneumonia which cannot be treated by antibiotics. Symptoms of Covid-19 can include:

Continuous dry cough

Sore throat

Fever (high temperature)

Tiredness

Difficulty breathing

Loss of taste and smell

The initial symptoms are similar to colds and flu-type illnesses, but the combination of a recent onset of fever and a new continuous cough seem to be present in many cases of Covid-19. However, it is important to be aware that in some cases the symptoms may be very mild or even non-existent, especially in children.

Procedure for infection or suspected infection

Any child who becomes ill with symptoms which could be Covid-19 while at the Club will be isolated from the other children by at least two metres until the child can be collected by his or her parents. If the child becomes seriously ill, we will call 999.

If a child or member of staff has suspected symptoms of Covid-19, they will be sent home and must follow the Government guidance for households with possible Covid-19 infection. This includes self-isolation and taking a Covid-19 test. See:

<https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance/stay-at-home-guidance-for-households-with-possible-coronavirus-covid-19-infection>

If children or staff experience any symptoms of Covid-19 they must not attend the Club until all symptoms have passed and they feel well and have a negative COVID result.

Infection control

Like the common cold and flu viruses, Covid-19 is spread by:

- Infected people passing the virus to others through large droplets when coughing, sneezing, or even talking within a close distance.
- Direct contact with an infected person: for example, if you shake or hold their hand, and then touch your own mouth, eyes or nose without first washing your hands.
- Touching objects (e.g. door handles, light switches) that have previously been touched by an infected person, then touching your own mouth, eyes or nose without first washing your hands. Viruses can survive longer on hard surfaces than on soft or absorbent surfaces.

We will take the following steps to reduce the risk of catching or spreading Covid-19 at the Club:

- Anyone entering the premises is directed not to if any of these conditions apply:
 - They are experiencing any Coronavirus symptoms such as cough, shortness of breath or difficulty breathing, fever, muscle pain, headache, sore throat, or new loss of taste or smell
 - They have tested positive for Coronavirus, or been advised by NHS Test & Trace to self-isolate.
 - If their temperature is greater than 37.8C.

Hygiene:

- Staff and children will wash their hands as soon as they arrive at the Club, and will be reminded to wash their hands regularly throughout the session, especially after using the toilet, before eating food, after coughing or sneezing and using equipment.
- Hand sanitiser will be available in convenient locations throughout the club.
- We will have tissues readily available for use when sneezing and coughing, and these will be disposed of, in a lidded bin, immediately after use.
- If they don't have a tissue to hand, children will be instructed to cough or sneeze into the crook of their arm.
- We will discourage children from touching their faces.
- We will discourage children from touching each other.
- Children will not be allowed to bring toys or games from home, and we ask that they bring only essential items with them to the Club.

Cleaning:

- Our contracted cleaners will pay particular attention to cleaning all touch points at the end of each day.
- Communal staff areas will be cleaned by staff according to a rota
- We will work with our host school, Canary Wharf College, to ensure that proper cleaning takes place between all those who hire the space (for example, community groups hiring the Sports Hall in the evenings will ensure all touch points are cleaned before we begin the next day's session)

Promoting good practice

We will promote infection control through the methods above, and in addition we will:

- Ensure that all staff have received training in, and understand, our new procedures

- Display posters and information to promote infection control
- Ensure that adequate supplies of cleaning materials are available within the Club
- Dispose of waste promptly and hygienically
- Provide tissues and suitable facilities for their disposal

Staff will be offered regular asymptomatic testing to prevent spreading the virus unknowingly.

Closure

We may need to temporarily close the Club if we have insufficient staff due to illness to run sessions safely. If this occurs the manager will contact Tower Hamlets Integrated Early Years Service for further support and guidance.

In the event that we have a number of confirmed cases of Covid-19 associated with the Club, we may need to close if advised to do so by the local Health Protection Team in order to limit the spread of the virus.

If the Club needs to close, the manager will notify parents or carers as soon as possible. The manager will also inform the Tower Hamlets Integrated Early Years Service as well as other relevant parties, e.g. feeder schools, other users of shared premises, etc. The manager will also notify Ofsted of the closure.
